- THOMSON at Home App, app for iOS and Android,

WiFi control module for roller shutters and blinds

Control your roller shutters remotely

- This micro module for roller shutters and blinds turns your switch for roller shutter / awning control into a wireless switch. You can stop your roller shutter or awning in any position using the app or with the help of your voice assistant.
- Your drive control can either be controlled via the original switch or remotely via WiFi.

- The micro module is simply connected in the built-in housing of the wired switch of your roller shutter / awning control.
