The Artwizz NoCase is ultra-slim and barely visible yet robust. The elastic Mate 10 Lite protective case is made of the best TPU material available. It's how the case can combine a sleek design with strong protection. The exceptionally grippy material gives the case a better grip on smooth surfaces. The UV-resistant material makes its resistant to sun damage and discoloration, while the innovative dot-technology prevents the material from adhering to your device on the inside. So everything looks like you like it. Artwizz NoCase is the most secure protection with the same Mate 10 Lite look.
