The Artwizz NoCase Color is ultra-slim, but it still offers optimal protection for the Galaxy A6 Plus (2018). The Galaxy A6 Plus (2018) glossy look is preserved by almost invisible protection provided by the dark NoCase. With the matte black variant of the NoCase, an elegantly polished dark optic is achieved. Despite being incredibly slim, the black NoCase Color is extremely robust. Made with the best TPU materials on the market, this elastic, translucent plastic can be formed to offer a unique combination of both slimness and protection. The protective case provides optimal grip, enhancing the way the smartphone rests in a user's hand, or on flat surfaces. In addition, the innovative texture of the dark NoCase's interior prevents the formation of suction surfaces. Ideally matched to dark smartphone colors, the NoCase Color brings the high-gloss finish elegantly to life. Smartphones benefit from the best possible protection, without sacrificing any of their grace and beauty.
