The Artwizz SmartJacket Pro combines reliable, all-round protection and a slim design. It has two connected parts: a precision engineered protective clip and a hinged front cover. It also features a card compartment inside the clip to safely store up to two cards. A sliding mechanism inside the back clip allows the cards to be pushed out with one finger, making them easily accessible at all times. The front cover's brushed optic gives it an almost metallic sheen on the outside, while the smooth, soft interior prevents scratches on screen of the iPhone. Additional protection is provided by a magnetic closure that prevents the front cover from accidentally opening. This ensures that the screen is always fully protected.
