Article no. AZ2505RB EAN / GTIN 4260632582541

MRP 9,99 €

- compatible with all cases
- especially convenient for one-handed use, selfies, typing and more
- your thumb can reach much more of the screen
- very flat and can be used as a single band or in dual combination

The Artwizz PhoneStrap is a smartphone holder to make it easier to operate your phone with just one hand. You can attach a single strap, or alternatively a combination of two straps, to your protective case. It allows you to do everything with just one hand: taking photos and selfies, typing and much more. Your mobile life is even more convenient and easy, as the strap greatly extends the range of your thumb over the screen. The ultra-flat PhoneStraps fit snugly against the case and are hardly noticeable during normal use. This means that you can still carry your smartphone comfortably in your pocket and rest it flat on a table. The different color combinations can be chosen to match your own fashion style and even accentuate it. The Artwizz PhoneStrap fits all protective cases that have cut-outs for the camera and at the bottom.
