The Artwizz Neoprene Sleeve Pro protects the MacBook Pro 16 against scratches and signs of wear. The neoprene material even shields against water droplets. The handy Artwizz sleeve is easy to transport and offers your device complete all-around protection. The neoprene case is a joy to behold and hold thanks to its elegant design and soft-touch exterior. The exterior compartment provides additional space for mobile accessories like chargers or cables and can be closed with a zipper. Inside the case, the soft fleece lining makes transporting your device easy and safe. The zippers are finished in titanium, gold or silver and are designed to create an elegant visual touch that sets off the color of the Neoprene Sleeve Pro to maximum effect. The padded, protective edge prevents direct contact between the aluminum housing of the MacBook Pro 16 and the metal-look main zipper, providing additional protection. All in all, the Artwizz Neoprene Sleeve Pro is the perfect companion for the MacBook Pro 16 . Of course, you can also use the 31.5 cm x 21.7 cm Neoprene Sleeve Pro with other devices.
