The CurvedDisplay has been specially developed to protect curved Galaxy S20 Plus screens. Thanks to the screen protector's rounded edges, its full-coverage protection extends over the device's curved edges. This enables the CurvedDisplay to deliver a premium touchscreen experience and reliable protection against scratches and cracks. Artwizz protective glass also provides effective protection against screen breakage, e.g. in the event of impact. The CurvedDisplay is precision-engineered for the Galaxy S20 Plus and provides optimum protection, even for the rounded edges. The screen protection glass adheres firmly to your mobile device thanks to its narrow adhesive edges. Our innovative Dot Technology ensures optimum usability. All of these features make the CurvedDisplay the ideal protector for the Galaxy S20 Plus curved display: completely and reliably protected.
