129,00 €

With the supplementary Hörmann BiSecur Cube, Hörmann doors and other devices, such as radio receivers for the power socket, can be easily connected to homee and controlled via app or voice assistant.

Cross-manufacturer communication is also possible - that means never again a separate app for each device!

Simply expand your homee with one of the other cubes, such as Zigbee, Z-Wave or EnOcean, and switch on the lights in the driveway and entrance area when the garage door is opened.

Product details

- Adds Hörmann BiSecur radio to your homee Brain Cube
- Networks e.g. Hörmann garage doors, room doors, radio receivers for sockets, etc.
- Your start into a smart home
