MRP
129,00 €

With the Warema WMS Cube, you can easily connect your Warema blinds, awnings and roller shutters to homee and operate them via the homee app or voice assistant.

Cross-manufacturer communication is also possible - this means you don't need a separate app for each device!

Simply expand your homee with one of the other cubes, such as Zigbee, Z-Wave, EnOcean or Hörmann BiSecur and, for example, conveniently and automatically switch on the light in the living room when your Warema blinds close in the evening.

Product details

- Adds the Warema WMS radio to your homee Brain Cube
- Networks Warema awnings, roller shutters or venetian blinds, among others, for your start into a smart home
- Perfect for beginners and professionals
- Plug & Play: Simply place on the Brain Cube and off you go!
