- UNDERSTAND YOUR INDOOR AND OUTDOOR ENVIRONMENT: indoor / outdoor temperature, humidity, air quality, indoor noise levels, barometric pressure
- RECEIVE REAL-TIME NOTIFICATIONS: use your Weather Station to customise indoor and outdoor alerts and get notifications on your smartphone. Ventilation alerts will tell you when it's time to air out your home
- ACCESS YOUR DATA REMOTELY: easily access all your weather data from your smartphone, tablet or computer
- ANALYSE PAST READINGS: review your data history to understand what happened while you were away or use graphs to understand weather trends
- EASY INSTALLATION AND FREE APP: your wireless Weather Station is easy to setup via Wi-Fi and the app (iOS or Android) is free

The Netatmo Weather Station Indoor Outdoor measures key data about your own indoor and outdoor environment. Easily access your weather measurements from anywhere on your Android or iOS smartphone, tablet or computer.Aluminum body is completely weatherproof.
The smart Weather Station features an unique set of sensors that let you analyse your indoor

environment as well as the weather outside. Data on temperature, barometric pressure, humidity and CO2 levels are sent to your smartphone seamlessly and wirelessly. Monitor and measure your environment and your weather any time, any place, intuitively and effortlessly, indoors and out. We spend 90% of our time indoors. The Netatmo Weather Station CO2 sensor warns you when you need to air out your home. The Weather Station lets you monitor indoor air quality, obtain real-time information on official pollution levels and choose the best time to do your outdoor activities.

Sensors and measurements:
Measurement frequency: every 5 minutes
Temperature units: °C (metric system) and °F (US system)
Barometric units: mbar (metric system) and inHg (US system)

Indoor:
Temperature: 0°C to 50°C / 32°F to 112°F; accuracy: ± 0.3°C / ± 0.54°F
Humidity: 0 to 100%; accuracy: ± 3%
CO2 sensor: 0 to 5000 ppm; accuracy: ± 50 ppm (0 to 1000 ppm) or ± 5% (1000 to 5000 ppm)
Sound meter: 35 dB to 120 dB

Outdoor:
Temperature: -40°C to 65°C / -40°F to 150°F; accuracy: ± 0.3°C / ± 0.54°F
Min and max temperature, "feel like" temperature and dew point
Humidity: 0 to 100%; accuracy: ± 3%
Barometer: 260 to 1160 mbar / 7.7 to 37.2 inHg; accuracy: ± 1 mbar / ± 0.03 inHg
7-day weather forecasts

Connectivity:
Wi-Fi: Compatible with 802.11 b/g/n (2.4 GHz)
Supported security: Open/WEP/WPA/WPA2-personal (TKIP and AES)
Wireless connection between indoor and outdoor sensors. Extended range of 100 m / 300 ft (without obstacles)
Wi-Fi router and Internet access. Hotspots are not supported.

Compatibility:
iOS 9 minimum required, Android 4.2 minimum required, Windows Phone 8.0 minimum required | PC & Mac through the Webapp | IFTTT compatible
