- PROTECT YOUR PROPERTY: receive instant alerts on your smartphone to let you know what is happening outside your home
- DETER UNWANTED VISITORS DAY AND NIGHT: the smart floodlight switches on when needed to deter unwanted visitors
- RECEIVE CUSTOM ALERTS: Presence distinguishes between people, cars and animals and will only provide updates on what you choose to monitor
- CHOOSE WHEN TO RECEIVE ALERTS: select the part of your garden and the events for which you wish to receive notifications
- FREE VIDEO STORAGE: store your videos at no additional cost and stream them whenever you want

Have alerts sent directly to your smartphone when an intruder or vehicle enters your property

Unlike conventional cameras which notify you whenever they detect movement, Presence can distinguish between people, cars and animals. Presence will tell you if someone is loitering around your home, if a car enters your driveway or if animals are in the garden.

Every home is unique. With Presence, you receive customised notifications that match your needs. You can choose to be alerted instantly when someone enters a zone you have selected. You can also choose not to receive alerts for animals. The Alert-Zones feature allows you to select specific areas for alerts if the camera detects a person, animal or car. Presence protects you day and night, thanks to its built-in smart floodlight. The light can be switched on manually in the app or set to come on when it detects a person, car or animal. It helps you find your way safely at night and deters any unwanted visitors. Simply install Presence in place of an outdoor light fixture or set it up wherever is best for you (entrance to your home, garden, etc.). In just a few minutes, you can install your very own sophisticated security system, complete with powerful floodlight. Your property is now protected against break-ins!

#### Specifications
