The 3-Pack Bundle of Netatmo radiator valves.

The Netatmo additional smart radiator valves designed by stack saves even more of the energy used to heat your home. It analyses your daily routine to optimise your heating schedule in any room. Heat according to individual room use. Control all your radiators using just one smartphone App from anywhere in the world.

Works only with the Netatmo Valve Starter-Set (incl. Relais) or Netatmo central thermostat.

Complete your Netatmo heating solution with the Netatmo Additional Smart Radiator Valves and take control of all of your individual radiators.

Up to 20 valves per installation.
