- Compact switchable Schuko plug incl. consumption measurement up to 1500 Watt
- Slim design allows several plugs next to each other without losing space
- Five different color rings for identification
- Compatible with the EnOcean protocol for Europe and China
- Range 30 meters

The new NodOn Micro Smart Plug is very compact and fits in any socket, even multiple socket without hindering the neighbor plug. It can turn any device (up to a maximum of 1500 watts) plugged into the plug on or off. Either controlled via the soft remote, or via a gateway like homee. There are 6 different color rings included to match the Nodon Softremote.

The Micro Smart Plug simultaneously measures current and cumulative power consumption.
