- Switching capabilities: 230V AC – 3A
- Maximum engine power: 280W Max – 60 Nm Max
- - Integrated zero crossing
- Consumption: <1W
- Device ID Type: Window Covering Device (0x0202)

This Zigbee Roller Shutter Relay Switch can be installed on your equipment (roller shutter, awning, sunshade blind) to connect it and turn it remotely or automatically controllable thanks to a Zigbee 3.0 compatible controller or gateway. Interoperable with the main Zigbee ecosystems on the market, this NodOn relay switch is ideal to centralize the roller shutters control of a room, a floor, or a full building. With a compact size, you can install it in a flush mounting pot >30mm or directly at the electrical panel with NodOn DIN Rail Box. The centralization of your openings and the creation of scenario become possible thanks to this relay switch, directly installed on your equipment, and adapted to it thanks to its auto calibration feature.

[zigbee]

Power supply: 230V AC ~ 50Hz

Switching capabilities: 230V AC – 3A

Maximum engine power:

280W Max – 60 Nm Max- Integrated zero crossing

Consumption: <1W

Radio frequency range: 2.4 GHz

RF power max: +10dBm

Range: up to 30m indoors

Operational temperature: -20°C to 60°C

Protection rating: IP 30

Rolling sunshades compatible

Device ID Type: Window Covering Device (0x0202)

Dimensions: 40 mm (l) x 44 mm (L) x 16.9 mm (h)
