- Connects wireless headphones to any wired headphone jack
- Pair two sets of headphones at once for shared listening
- Send music from your phone to the AUX-IN in your car or boat
- Built-in battery lasts 16+ hours and recharges via USB-C
- Receives audio from your iPhone to the AUX IN in rental cars, older stereos, boats and other non-bluetooth speakers

Use AirPods or any wireless headphones where you normally can't.

Plug AirFly Pro into the headphone jack on a plane to watch live TV or a new movie with your favorite wireless noise-cancelling headphones. Connect AirFly Pro to the treadmill headphone jack to use your AirPods with the TV at the gym. You can also pair two sets of AirPods or wireless headphones with AirFly Pro so two people can listen to the same movie, podcasts or video game. Think of AirFly Pro as a headphone splitter for wireless headphones.

Possible scenario: You and your friend watch a movie together on the plane, and later you can

listen to your music in your car.

The charging time to fully charge the AirFly from empty is approx. 2 hours.

Scope of delivery: AirFly PRO, charging cable (USB to USB-C for charging the Airfly Pro), premium travel pouch, 2-pin airline adapter
