- 190 LED RGB and white tones including warm white, up to 16 million colors
- 5m wide, 10cm distance between the individual LED cones
- A color / effect can be assigned to each individual LED
- Free TWINKLY smartphone app
- Extensive predefined effects, timer in the smartphone app

Twinkly ICICLE in the icicle shape is the revolutionary LED light chain, which brings the most advanced technology into home decoration.

The RGB colors and white tones including warm white are highlighted by the special matt and flat finish of the Twinkly lens. This results in an even diffusion of the chromatic components without changing the expressiveness.

A variety of effects can be created in conjunction with the Twinkly smartphone app.

Each individual LED can be assigned a color, so extremely individual effects are possible.

The mapping function in the app takes over the detection of the position of the individual LEDs in a matter of seconds.

A large number of predefined lighting scenarios are already available, and additional effects can be downloaded free of charge from the Twinkly Store.

The fairy lights are suitable for indoor and outdoor. (Temperature range -15 degrees - +40 degrees) IP44

Home integration via WLAN (Bluetooth for initial setup), voice control via Google Assistant or Amazon Alexa.

5m W x max 0.7m L

LED scheme 2 - 4 - 6 - 5 repeating

Supply line transformer to the first LED 5.5m
