- 400 LED white tones including warm white (amber, warm white, cold white)
- 32m length
- Distance between the LEDs 8cm
- A color/effect can be assigned to each individual LED
- Extensive predefined effects, timer in the smartphone app

Twinkly STRINGS is the revolutionary LED string light that brings the most advanced technology to home decoration.
400 4.3mm LEDs allow all shades of white to shine, from cold white to warm white.

In connection with the Twinkly smartphone app, a variety of effects can be created.
A color can be assigned to each individual LED, so extremely individual effects are possible.
The mapping function in the app records the position of the individual LEDs in a matter of seconds.

In addition, a Christmas tree with the Twinly light chain used can be "read" via the smartphone camera and thus effects in colour, gradient, dynamics can be created specially adapted to this

tree.
A large number of predefined light scenarios are already available, and additional effects can be downloaded free of charge from the Twinkly Store. A timer can be set via the app.
The fairy lights are suitable for indoor and outdoor use. (Temperature range -15 degrees - +40 degrees) IP44
Home integration via WiFi (Bluetooth for initial setup), voice control via Google Assistant or Amazon Alexa and Apple Homekit.

Grouping with other TWINKLY products possible, only within RGB - RGBW, AWW products sorted.
